## WORLD SPACE WEEK

OCTOBER 04 - 10, 2020

Theme: **Satellites Improve Life**

# World Space Week 2020

Welcome to World Space Week 2020 Celebrations organised by Astrophile Education Services, New Delhi. World Space Week is a global celebrations marking two historic events in the filed of space exploration:

1. October 4, 1957: Launch of first man made satellite Sputnik 1, this opening the space exploration for mankind.
2. October 10, 1967: The signing of the treaty on “Principals governing the activities of Sates in the Exploration of Peaceful User of Outer Space”, including the Moon and other celestial bodies.

Astrophile Education Services has planned several events and activities during the week long global celebrations to create a platform for one and all to be included. The details of the event are listed below.

Each day one new event and activity will be organised. Each day students will get to try something new. Each day we will look at the universe in a slightly different way.

The generic rules for the activity are as follows:

1. Students have to submitted their original content. Plagiarism will not be tolerated or accepted.
2. Each entry shall have the Name, Class, School name, email address mentioned clearly on the submission file.
3. Your entries will be shared on our social media accounts, (links to which are available on your website). Your submission will give us the permission to share your content on our page with your Name, class and School.
4. The language for participation is English only.
5. This is NO COMPETITION so try to do things your own way.
6. Each successful submission will get a Digital Certificate of Participation.
7. For virtual debate, you can participate only with a team member. In the remarks section, you have to mention your opponent.
8. All submissions shall be made by 23:59:50 on the date mentioned in the specific event group.
9. All entries to be submitted by email or google drive shall use the email address “[astrophileevents@gmail.com](mailto:astrophileevents@gmail.com)”. Entries submitted on any other email address shall not be accepted or considered valid.
10. For list of activities and other details, scroll down

### Day 5: October 08, 2020: Virtual Debate competition

Theme: "Satellites improve life"

The theme of this year is Satellites improve life and our centre of debate will be the same. Each school can participate with as many entries as possible, but in pairs. One speaking for the motion, while other speaking against. You can share your debate speech in a video of less than 5 mins followed by the video of your opponent from your team. You can also share the script in pdf format if sharing video is a problem.

Submission date: 14/10/20

Submission process: Complete the essay and share it with us in the following way:

- If you are writing on a computer, make a pdf and email the document at [astrophileevents@gmail.com](mailto:astrophileevents@gmail.com)
- If you are working on a paper, then take an image of the sheet making sure the text is readable and send us the image at [astrophileevents@gmail.com](mailto:astrophileevents@gmail.com)
- If you wish to read the debate speech then you are welcome to share the same video format. Make sure you have mentioned your name, class, school, city and your team member's name before you start the debate. Also Your partner needs to do the same so that we can combine the same.
